# STATEMENT OF PURPOSE TO STUDY IN CANADA

## Introduction

I, Mohammad Sayeed Majid Syed have been admitted to the North Campus of Humber College (located in Etobicoke, ON M9W 5L7, Canada) to pursue a college graduate certificate in Artificial Intelligence and Machine Learning. I would like to apply for a study permit to undertake the course.

My professional goals have consistently been driven by my continuous pursuit of knowledge and understanding in my field of interest. I earned my Bachelor of Engineering degree in Electronics and Telecommunication Engineering from the Sinhgad Academy of Engineering, which is affiliated to Savitribai Phule Pune University in Pune, Maharashtra, India. I have diligently focused on my academic studies from 2014 to 2018.

Since my early years, I have been deeply engaged in DIY projects and technical tasks. I take immense pride in my capability to assemble and maintain my personal computer, a task that demands precision and patience. However, my curiosity was not confined to computers. I also derive pleasure from servicing my own motorcycle and car, gaining a deeper understanding of their inner workings. My technical abilities also include AutoCAD design, in which I continue to create small-scale models for do-it-yourself projects. I am not one to back down on practical tasks either. I have gained experience in home electrical wiring and plumbing, always on standby, to resolve any household issues. Another hobby that I cherish is gardening, a tranquil activity that allows me to bond with nature in my own backyard. Within my family, I am the primary contact for all technical requirements. I offer technical assistance for my dad's software and hardware needs, and always prepared to diagnose and find solutions. In summary, I am a versatile individual with a passion for learning and problem-solving. Be it a complicated mechanical problem or a simple gardening task, I am always ready to dive in and get the job done. Beyond my technical interests and pastimes, I have a deep affection for animals. I have always enjoyed assisting stray animals, such as dogs and cats, and I have never turned down the opportunity to assist other animals in need, such as birds. Empathy towards animals is another characteristic that shapes my identity.

Upon completing my education, I began my professional experience with the renowned company Infosys, serving as a Technical Process Executive. In this role, I applied my technical expertise and problem-solving skills to support Intel employees globally by providing software and remote support as part of the Intel project. However, after a while, I took a pause from Infosys to assist with family matters, specifically our relocation to a new home.

The COVID-19 pandemic then struck, presenting an immense challenge for the global community. Once the lockdown restrictions were lifted, I picked up a job at Harmony Plus, a small-scale company that specialized in water solutions. There, I worked as a Technical Solutions Specialist, providing technical support to their valued customers. After my tenure with Harmony Plus, I returned to Infosys and rejoined the Intel project, This time taking on the position of an IT Support Specialist, also known as a Senior Technical Process Executive. My responsibilities encompassed providing remote assistance to Intel's top executives and functioning as a Level 1 and Level 2 Macintosh Support Engineer, offering comprehensive technical support for the Apple ecosystem at Intel. Throughout my professional journey, I have remained eager to learn and embrace new challenges, continuously striving for growth and development. After a successful two-year career at Infosys,, I decided to broaden my horizons and join a different organization to gain exposure to a new environment and further my growth and learning. This led me to Northern Trust, where I currently serve as an Analyst Software Support in the Info Security Department.

During university, my interest in Artificial Intelligence (AI) and Machine Learning (ML) was sparked as I explored the buzz, news, and scholarly articles surrounding these transformative fields. These technologies have revolutionized problem-solving and decision-making in many industries, from digital assistants to autonomous vehicles and data analysis. Recognizing their future importance, I am motivated to improve my skills and contribute to this field. By studying AI and ML, I aim to understand the latest developments and to create innovative solutions in this rapidly evolving discipline.

## English Language Proficiency

I have appeared for IELTS test on 10th October 2022, and following are my scores for each module are below:

| | |
|---|---|
| **Overall** | **7.0** |
| **Listening** | **7.5** |
| **Reading** | **7.5** |
| **Speaking** | **7.5** |
| **Writing** | **6.0** |

## Why Canada?

I selected Canada as my destination for further education because of its esteemed standing in higher education and research, especially in the areas of Artificial Intelligence (AI) and Machine Learning (ML). Canadian institutions are leading the way in AI research, and I am excited to both learn from and contribute to this dynamic academic environment. What sets Canadian education apart is its practical approach to teaching, which can be directly applied to a professional career. The cost of education is also reasonable compared with other countries that offer quality education. Canada is known for its cultural diversity, with people from all religions, races, and cultures cohabiting harmoniously. The friendly nature of Canadians help students in acclimate to the new environment. The multicultural setting offered me the opportunity to interact with individuals from diverse backgrounds and ethnicities. Among other positive aspects, Canada is also recognized as one of the safest countries in the world. In summary, Canada presents an ideal environment for me to advance in my career.

## Why Humber College?

In my search for the right college, I discovered a course at Humber College that perfectly aligns with my academic interest. Humber College provides access to cutting-edge technologies and an experienced faculty, which will undoubtedly help me to expand my knowledge and skills. Upon reviewing the syllabus, I was introduced to subjects such as Data Analytics, Artificial Intelligence Project Management, Natural Language Processing, etc., which will equip me with a comprehensive understanding of Artificial Intelligence and Machine Learning technologies. The prime location of Humber College also positions me favorably for securing internships in my field.

## Why Artificail Inteligence(AI) and Machine Learning(ML)?

During my time as an undergraduate years, I cultivated a strong interest in robotics and actively engaged in the college's robotics club. This involvement provided me with the opportunity to examine practical applications of electronics and telecommunication principles. In this setting, I first encountered the principles of Artificial Intelligence (AI) and Machine Learning (ML). The more I researched into AI and ML, the more fascinated I became. I was attracted by the ability of these technologies to learn and adapt over time, emulating human intelligence but with the capability to process and analyze data on a scale far surpassing human abilities. I came to understand that AI and ML are not only the future of technology, but are swiftly becoming a part of our present. In the current competitive landscape, it is crucial to keep pace with the latest technologies. AI and ML are revolutionizing industries worldwide, leading to an increasing demand for professionals proficient in these fields. By pursuing a college graduate certificate in AI and ML, I aim to enhance my skills and equip myself with a career in this dynamic and rapidly progressing field.

**Future Plans/Return to India**

Upon completing this course, I plan to return to my homeland. The international study experience and internship I will have gained will strengthen my prospects of landing my dream role as an AI Engineer. This course will pave the way for exciting career opportunities and job prospects in India, a country that thrives in the Information Technology sector and attracts investment from foreign businesses. Acquiring new technological skills is vital to personal growth. The course will also equip me to pursue a variety of roles, including Data Scientist, Machine Learning Engineer, Business Intelligence Developer, Research Scientist, AI Engineer, Quantitative Analyst, and Database Engineer. As job opportunities increase, so does the competition also increases. However, an overseas education provides a competitive edge, given the in-depth knowledge and global-level hands-on experience it offers. This would make me a better human being and enable me to secure a well-paying job with benefits, aiding in establishing a stable life back in India.

My family is composed of my parents, one brother, and two sisters. My father is the sole proprietor of a small-scale business, and my mother is a homemaker. We live in a well-established house, and all our financial investments are located in India. My brother is employed as a Player Interaction Specialist at Ubisoft. My elder sister serves as an Assistant Professor at Poona College of Pharmacy. My younger sister, who has completed her Masters of Business Administration program, is currently seeking employment while she is assisting my father in his office administration and accounts. Upon completion of my studies, I will settle back home in India to fulfil my parents' dreams and provide them with the comfort they have always desired.

As for my documents, I have included my GIC receipt ($20,635 CAD) and tuition fee payment receipt ($18,478 CAD) along with other necessary documents. I kindly request that you expedite the processing of my Visa application so that I can plan my resignation and travel accordingly.

Sir/Madam hope you will find all my documents in proper order, and kindly request you to process my visa application as soon as possible. I am submitting the entire required academic as well as other necessary documents, which are attached herewith.

I am highly obliged to you for taking out precious time to process my student visa application.

Thanking you,

Yours sincerely,

Mohammad Sayeed Majid Syed
